EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Dana Rewoldt on July 6, 2006.

The application has been amended as follows:

In the claims:

In claim 9, line 2, the term, "conferring" was deleted.

In claim 13, line 1, the article "The" was replaced with --A--.

2. Claims 1-21 are allowed.

2. The following is an examiner's statement of reasons for allowance: Applicants have developed an inbred maize line designated "NP2391." Several morphological and physiological traits expressed by plants of this line are disclosed in Table 1. A deposit of seeds of this line has been made with the ATCC, and a statement of the deposit satisfying the requirements of 37 CFR 1.801-1.809, which includes that all restrictions on availability to the public will be irreversibly revoked upon issuance of a patent, is on page 22 of the specification. U.S. Patent No. 6,362,404 teaches seeds and plants of maize line "17QFB1," which expresses some of the same traits NP2391, such as having green-yellow silks and anthers, yellow endosperm, and normal

Art Unit: 1638

endosperm starch type. However, the prior art does not teach any inbred maize plants that have the combination of traits shown in instant Table 1. Regarding claims 2 and 5: when the part of the plant is a seed, it is interpreted to be the seed from which the claimed plant is produced.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
